## Frontend Developer & Interface Designer

---

Frontend developer with a strong UX mindset. I design flows and interfaces in Figma, then build responsive, maintainable UIs in React/Next.js with TypeScript. Recently, I owned an end-to-end UX/UI redesign during my internship at Framsteg 247 and implemented key parts in a real product codebase.

### Skills

Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive UI
State & data	REST APIs (fetch/axios), async patterns, loading/empty/error states, Zustand / Context API
Backend basics	Node.js, Express, authentication (JWT), security basics
UX & product	Figma, user flow mapping, prototyping, accessibility basics, design-to-code handoff
Tools	Git & GitHub, Vite, npm/pnpm, Chrome DevTools, Vercel/Render deployments, Agile teamwork

### Experience

- 2025 - Present **Frontend & UX Intern**, *Framsteg 247*, Gothenburg.  
○ Owned the UX/UI redesign end-to-end: identified usability issues, mapped new user flows, and designed screens/components in Figma  
○ Implemented key parts in Next.js (TypeScript, Tailwind) with reusable components and consistent UI patterns  
○ Worked iteratively with the Product Owner; improved solutions based on feedback and standups
- 2024 - Present **Preschool Teacher**, *ABC All About Children Preschool*, Gothenburg.  
○ Afternoon Club responsibilities; collaboration with staff and guardians in a fast-paced environment
- 2022 - 2024 **Leisure Time Teacher (Fritidslärare)**, *Åkeredsskolan*, Gothenburg.  
○ Developed interactive learning activities and created digital materials

### Selected Projects

- Framsteg 247 (UX/UI + Frontend) End-to-end redesign work: user flows, prototypes, and UI components. Implemented parts of the product in Next.js (TypeScript, Tailwind) with reusable patterns and production-style collaboration.
- Designish (E-commerce Store) Responsive store with product listing/detail flows, cart and wishlist, local persistence, and dynamic data fetching from Fake Store API. Built with React, Vite, Tailwind CSS, and React Router.
- Chappy (Real-time Chat App) Full-stack chat app with public/locked channels, direct messages, and JWT auth. Built with React + TypeScript frontend and Node/Express + DynamoDB backend; deployed and configured as a combined app.

---

## Education

- 2024 - Present **Frontend Developer**, *NBI/Handelsakademin*, Gothenburg.
- 2024 Aug. - 2025 Jan. **IT - Back-end Developer**, *Sundsgårdens Folkhögskola*, Rydebäck.
- 2024 Jan. - 2024 Jun. **IT - Tech for Women**, *Sundsgårdens Folkhögskola*, Rydebäck.
- 2020 - 2021 **IT-Support and Service Desk Technician**, *Campus Mölndal*, Gothenburg.
- 2015 - 2018 **M.S. in Educational Research**, *Gothenburg University*, Gothenburg.
- 2010 - 2015 **B.S. in Early Childhood Education**, *Middle East Technical University*, Ankara.
